

Vedant Darak

Chicago, IL | (872)-664-2578 | vdarak.infinity@gmail.com | [LinkedIn](#) | [Portfolio](#)

Frontend Design Engineer skilled in blending UI/UX design, front-end engineering, and human-centered research to deliver effective digital solutions. Background includes creative AI systems, enterprise SaaS infrastructure, developing reusable design systems, prototyping interactive concepts, and collaborating with cross-functional teams.

WORK EXPERIENCE

Mercor – Frontend Design Expert

Jan 2026 – Present | Chicago, IL

- Evaluated generative AI design quality across **14+** domains (UI, branding, 3D, editorial, motion and interactive) for state-of-the-art models from frontier AI labs, designing **200+** targeted evaluation prompts covering aesthetic, functional, and creative edge cases directly improving model output quality scores by **18%** across **3** design mediums.
- Prototyped and stress-tested interactive visual concepts for various design mediums in **HTML/CSS**, **three.js**, and **Processing** to validate **AI model** outputs that accelerated stakeholder feedback cycles by **2 weeks** per review.
- Established evaluation rubrics and scoring documentation for **14** design mediums, reducing inter-rater variance by **30%**, reducing per-session review time from **90 to under 45 minutes** and enabling **consistent** cross-evaluator assessment at scale.

Cognijin Co. – Frontend Design Engineer

Aug 2025 – Dec 2025 | Chicago, IL

- Redesigned and shipped **3 client websites** with Next.js admin dashboards, driving a combined **114% increase in organic traffic**, generating a combined **\$50K+ in monthly revenue** and doubling lead capture rate across all engagements.
- Built a **30+** component design system in **Next.js**, **React**, and **TypeScript** with **Figma-to-code** token alignment and **WCAG 2.1 AA** compliance adopted as the production component library for an agentic AI job search product.
- Led end-to-end **UX** in **Figma** and **frontend engineering** within a CI/CD pipeline, partnering with PMs and engineers to ship onboarding, filter system, resume editor, and AI interaction surfaces reducing **prototype-to-production** cycle from **6 weeks to under 2**.
- Conducted **WAVE** and **Lighthouse** accessibility audits across all shipped surfaces, resolving **100% of critical WCAG violations** pre-launch and achieving an average Lighthouse accessibility score of **94/100**.

Infinichains (Credibl) Inc. – Software Designer

June 2022 – Aug 2023 | Remote

- Architected an **ESG** analytics dashboard for **3** enterprise clients serving **500+** users in **React** and **Chart.js**, designing component architecture and optimizing API state flows for **real-time** accuracy across concurrent data streams contributing to a **10%** increase in client retention.
- Built a **20+** component design system with **Figma** documentation covering variants, usage constraints, and interaction patterns reducing **design-to-dev** handoff friction by **30%** and enabling **consistent** UX across all deployments..
- Led mixed-methods research (stakeholder interviews, usability tests, surveys) to identify navigation bottlenecks and visualization issues which validated a **25%** task completion improvement and a measurable uptick of **10%** in user satisfaction scores via restructured IA.
- Conducted **NVDA** and **VoiceOver** screen reader testing throughout the dashboard, ensuring **WCAG 2.0** compliance across all data visualization and navigation surfaces for enterprise users.

PROJECTS

Trevi

Dec 2025 – Feb 2026

(Design System, Heuristic Evaluation, Information Architecture, Next.js, Progressive Disclosure, React Flow, TypeScript)

Shipped a **spatial AI research tool** from zero to alpha in **2 weeks** for a neurosurgeon client replacing **linear chat** with a **React Flow** knowledge graph built with custom **D3-inspired** layout algorithms and Framer Motion animations.

[Spotting the Bias in News](#)

May 2025 – Jul 2025

(Figma, Information Architecture, Mobile Design, Qualtrics, R Studio, Surveys, Usability Testing, User Interviews)

Designed **ANA** - a mobile AI news aggregator tackling **media bias transparency**. Conducted mixed-methods research across **70+** participants, achieved an **82%** user credibility rating, and synthesized card sorting, literature review, and survey data into a bias-scoring model.

SKILLS

- **Languages:** HTML, JavaScript, Python, Next.js, React, Tailwind CSS, TypeScript
- **Tools:** Figma, GitHub, Jira, Lighthouse, Miro, NVDA, Qualtrics, R Studio, Visual Studio Code, Voice-over, v0, WAVE
- **Hard Skills:** A/B Testing, ARIA Implementation, Accessibility Audits, Design Systems, Front-end Development, Information Architecture, Journey Mapping, Rapid Prototyping, Storytelling, Typography, UX Design, User Research, WCAG 2.1, Wireframing
- **Soft Skills:** Adaptability, Communication Skills, Decision Making, Problem-Solving, Teamwork and Collaboration

EDUCATION

Master of Science in Human-Computer Interaction - DePaul University, GPA **3.6/4.00**

June 2025 | Chicago, IL

Bachelor of Engineering in Computer Science – VESIT, GPA **3.63/4.00**

May 2022 | Mumbai, India
